Then provide short answers, in your own words.

Two or five concise sentences that explain your answers.

1) What worked well in the lab?

   The integration with AWS I thought would be a problem but surprisingly was smooth.

2) What parts were troublesome?

   Generation the AWS Access Key and importing to ubuntu

3) Over all impression of the lab?

   It was a good lab since I had to do it to a different class as well.
