Parrot Terminal
Greenbone Security Ass...

1) What worked well in the lab?

   The lab was delayed a little bit but, after few refreshers started worked properly.

2) What parts were troublesome?

   In this lab, I had no problems; all the steps were clear and smooth. The only issue I encountered was with one of the passwords on the parrot machine due to the caps being inverted.

3) Over all impression of the lab?

   I really like this lab. Creating the virus part was fun; I spent more time on that part because I tried to create different types of viruses and explore various possibilities.
